Golden bronze and faceted crystal are the perfect combination for a refined and luxurious interior decoration. The elongated shape and melodic overflow of the crystal of the collection add more metaphor and hidden depth to the classic style, which is always relevant even in the surrounding modernity. Choose a striking piece for yourself and make it the jewel of your home.

Verene

The collection of chandeliers is an unmistakable solution for sophisticated interiors, which skillfully combine elements of baroque and empire, as well as classicism and modern. Faceted glass crystals, like diamonds frozen in a block of ice, attract with their sophistication and light up in the evening darkness to create magical illumination.

CLASSIC

Kinia

Elegant lamps will be a wonderful decoration for the premises of creative people – writers or artists, as well as representatives of rare hobbies. Extraordinary personalities do not recognize unshakable traditions and binding rules. This collection is a real symbol of open rebellion and true independence. An unexpected contrast is possible by combining chandeliers from this collection with models made in pompous style. Create ambiguity and experiment with shapes.

Sylwia

The design of the Sylwia series combined trendy textures and silhouettes. The metal fittings are painted in brass and black. Noble shades are favorably emphasized by white plafonds from opaque glass. The compact dimensions of the fixtures are relevant, including for low ceilings. The series will take its rightful place in the interiors of modern bedrooms and living rooms, decorated in the style of eclecticism and minimalism.

TECH

Gita

Compact and stylish series of luminaires designed for interior lighting. Luminaires that combine functional and decorative lighting. The metal body is complemented by acrylic luminous rings that provide additional illumination. Built-in super-bright LEDs fill the room with soft, diffused light.

TECH

Edda

Overhead lamps act not only as a source of main and additional lighting, but also help to zone the room and place light accents. Compact overhead lamps take up little space and do not «eat up» the extra volume of the room.

CONVENTIONAL DESIGNATIONS

Number of lamps, pcs.

Minimum-maximum height, mm

Width, mm

Offset from the wall, mm

Length, mm

Diameter, mm

Light scattering angle, °

Universal mount

Maximum power, w

Lighting source

Colour
